

Training Courses – Ships Crew

Many companies now recognise the value of good quality training which, in many cases, can result in a reduction in equipment damage, load damage and more importantly employee injury.

At Austin & McLean we have developed a range of training packages to help meet Employers Statutory Legal requirements as well as provide participants with valuable skills and knowledge which can be of immediate benefit in the workplace.

We offer the following intensive one day training courses tailored to meet the requirements of the shipping industry and in accordance with the new LOLER and PUWER regulations 2006:

Lifting Equipment User

Legal obligations • planning of lifting operations • load assessment & rigging • pre-use inspection • safe handling & maintenance • correct marking & storage of lifting equipment

Training can be delivered on board, at our premises or via distance learning package

Working at Height

Regulations • potential hazards • correct planning & equipment selection • safe use, inspection & maintenance of fall restraint & fall arrest equipment

Training can be delivered on board or at our premises

In addition to the above, our training portfolio includes Confined Space, Forklift Truck Operator, Ships cranes, Banksman/Slinger-Signaller and Access Equipment.
