

fall arrest harnesses

A comprehensive range of personal safety harness systems.

Manufactured using highest quality polyester webbing, which has exceptional resistance to UV, chemicals and water. PU coating provides good abrasion resistance.

A unique new elasticated webbing, 'Surefit' is fitted into leg or shoulder straps on selected harnesses. 'Surefit' is a major breakthrough in comfort for those wearing harnesses for long periods of time or for those workers constantly bending or stretching.

Standard Harness

Full body harness with dorsal D for basic fall protection. For applications where minimal weight is required.

- Lightweight harness
- Comfortable and easy to fit
- Simple to adjust

Rescue Harness

Full body harness fitted with front and dorsal D with an additional shoulder lifting strap to allow rescue or retrieval in a vertical position. Elasticated 'Surefit' comfort panels in the leg straps.

- Rescue straps fold away when not required
- Ideal for use in confined spaces (BS type E)
- Easily attached to rescue equipment

Shown above are just two of our large range of harnesses.
